I actually zeroed on three units - two of being pioneer (\$180 and \$160) and the other being the Alpine CDA -9883. This is radio has 3 RCA outputs (for amplifier, subwoofer (s)), is HD radio ready, SAT radio ready and of course plays mp3's and AAC's. The best thing I like about this product is its integration with the IPOD.

Mark R. Woodward's *Islam in Java: Normative Piety and Mysticism in the Sultanate of Yogyakarta* (1989) was one of the most important work on Indonesian Islam of the era. This new volume, *Java, Indonesia, and Islam*, builds on the earlier study, but also goes beyond it in important ways. Written on the basis of Woodward's thirty years of research on Javanese Islam in a Yogyakarta (south-central Java) setting, the book presents a much-needed collection of essays concerning Javanese Islamic texts, ritual, sacred space, situated in Javanese and Indonesian political contexts. With a number of entirely new essays as well as significantly revised versions of essays this book is a valuable contribution to the academic community by an eminent anthropologist and key authority on Islamic religion and culture in Java.

TTThis volume contains expert articles on the physiology and function of the microvascular and microlymphatic systems, the physiology of microvascular fluid filtration and reabsorption, interactions between blood cells and the microvascular endothelium, and molecular mechanisms of leukocyte activation. The therapeutic goals in chronic venous insufficiency include reduction of postischemic leukocyte-endothelial cell interaction, repair of microvascular barrier and improvement of microlymphatic drainage. In addition to measures to counteract inflammatory reactions elicited by local ischemia, surgical procedures such as transplantation of lymph vessels and subfascial division of perforating veins by an endoscopic approach are reviewed. Written by leading experts in the field, this book provides the first synopsis of the role of microcirculatory

disturbances in chronic venous insufficiency. It will be of particular interest to phlebologists, angiologists, dermatologists, gerontologists, vascular, plastic and reconstructive surgeons, and general physicians.

In this text, students are invited to rethink psychology by grounding it in the natural sciences with the understanding that evolutionary and developmental processes work together with culture to solve problems of human adaptation. These processes are cast as interdependent: Development cannot be understood except in the light of evolutionary theory, and the best proof of evolution is the fact of development. For students of evolutionary psychology, all the central topics -- such as evolved mental modules for theory of mind or language -- require an understanding of the developmental processes that lead to their expression. Genes, as important as they are, are never the whole story. The role of biological factors is explored in chapters outlining evolution, development, genetics, human origins, hormones and the brain. Then, the integrative value of this evolutionary/developmental vision in understanding key topics in psychology is illustrated by applying it to traditional area of inquiry including infancy and attachment, emotions and their expression, social relations with peers, cognitive and language development, sex differences, courtship and mating, violence and aggression, and cooperation and competition.

Provides information on composting with earthworms, covering such topics as caring for a worm bin, harvesting, and growing worms and vermicompost for sale.
