The Fiat Siena was a compact car produced by the Italian manufacturer Fiat since 1996. It is the four-door sedan version of the Fiat Palio, a supermini car especially designed for developing countries. It was introduced for the first time in South America, and was produced in various countries worldwide. Later, in 2002, a similar car based on the same platform was developed for the European market, the Fiat Albea. It replaced the Siena in these European markets, such as Poland, where the origina

Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

Leadership: A Communication Perspective has been at the forefront of university and college leadership courses for nearly three decades, providing a compelling, authoritative introduction to leadership as a communication-based activity. The new edition continues the tradition of excellence with an up-to-date treatment of theory and research combined with practical, real-world advice for improving communication competence and leadership effectiveness. Relevant: The authors profile contemporary leaders and organizations like Alibaba’s Jack Ma, Zappos’ Tony Hsieh, Facebook’s Sheryl Sandberg, Uber, The Container Store, Airbnb, Chipotle, the Waffle House, Nordstrom, and Google. Their presentation balances current scholarship and trends with historical perspectives to provide a fuller understanding of the study and practice of leadership. Comprehensive: Leadership and followership are examined in multiple contexts, including organizational leadership, public leadership, and leadership in groups and teams. Topics new to this edition include transcendent followership, the leadership skills approach, team coaching, escalation of commitment, invisible leadership, cultural intelligence, trigger events, and resilience. Full-featured: Self-Assessments measure readers’ perceptions of personal leadership skills, communication style, cultural intelligence, motivation to lead, and more. Case Studies examine leadership situations and pose thoughtful questions that prompt students to apply their experiences and understandings. Research Highlights summarize seminal and recent scholarship. Chapter Takeaways reinforce important concepts and action steps. Application Exercises offer abundant opportunities to explore, practice, and reflect on chapter content. Cultural Connections discuss leadership expectations and behaviors in other cultures. Leadership on the Big Screen correlates chapter concepts with the themes of popular films and documentaries.

What if Ariel had never defeated Ursula? It's been five years since the infamous sea witch defeated the little mermaid... and took King Triton's life in the process. Ariel is now the voiceless queen of Atlantica, while Ursula runs Prince Eric's kingdom on land. But when Ariel discovers that her father might still be alive, she finds herself returning to a world--and a prince--she never imagined she would see again.

This book provides glimpses into contemporary research in information systems & technology, learning, artificial intelligence (AI), machine learning, and security and how it applies to the real world, but the ideas presented also span the domains of telehealth, computer vision, the role and use of mobile devices, brain–computer interfaces, virtual reality, language and image processing and big data analytics and applications. Great research arises from asking pertinent research questions. This book reveals some of the authors’ “beautiful questions” and how they develop the subsequent “what if” and “how” questions, offering readers food for thought and whetting their appetite for further research by the same authors.
